

DHAIRYA PATEL

Gujarat, India

 [+91-7016671904](tel:+91-7016671904)  pateldhairya2k5@gmail.com  [LinkedIn](#)

Education

VIT Bhopal University

B.Tech - Computer Science and Engineering — CGPA: 8.52

2023 – 2027

Madhya Pradesh

Experience

Research & Development Intern — [Encrypta](#)

May 2026 – Present

- Working in the R&D department contributing to applied research in cybersecurity and software systems.

Skills

Languages: Python, SQL, C++

Data Analysis & ML: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Statistical & Time Series Analysis

Tools & Frameworks: Excel, Power BI, PostgreSQL, PySpark, AWS (Athena, Redshift)

Projects

Reinforcement Learning-Based Stock Trading Simulator | *Python, NumPy, Matplotlib*

Personal Project

- Developed Q-Learning trading agent using Geometric Brownian Motion for price simulation across 5,000+ trading episodes.
- Achieved 18% higher risk-adjusted returns (Sharpe Ratio) compared to buy-and-hold benchmark across multiple volatility regimes.
- Analyzed agent performance in high-volatility environments, validating reinforcement learning for quantitative trading strategies.

Custom Auto Sector Index Construction | *Excel, Financial Modeling*

Personal Project

- Constructed a 9-stock Auto sector index using price-weighted, market-cap, free-float, and equal-weighted methodologies.
- Performed concentration risk and volatility attribution analysis — Maruti Suzuki & M&M contributed 30–40% of total portfolio risk.
- Evaluated return distribution and risk metrics across all weighting schemes for improved sector allocation decisions.

Financial Operations Analytics System | *Python, Pandas, Statsmodels*

Personal Project

- Built revenue forecasting system using ARIMA and Prophet models targeting $\pm 5\%$ MAPE for a SaaS business.
- Developed churn prediction models with logistic regression and tree-based classifiers achieving over 80% accuracy.
- Performed CLV modeling and RFM cohort segmentation to generate insights for revenue optimization and retention strategies.

Achievements

- ZS Associates Campus Beats Case Challenge** — Solved national-level business case on strategy, analytics, and problem-solving.
- EY CAFTA 2026 National Case Championship** — Built treasury & hedging framework for commodity price risk and FX management.

Relevant Coursework

Mathematics & Statistics: Applied Linear Algebra, Probability and Statistics, Calculus, Numerical Methods

Computer Science: Data Structures and Algorithms, Database Management Systems, Computer Networks

Data Science & ML: Foundations of Data Science, Fundamentals of Machine Learning

Certifications

- NISM Series VIII – Equity Derivatives** (In Progress) | SEBI Certified
- CISCO – Networking Devices and Configurations**
- MATLAB Onramp**
